## FULL STACK DEVELOPER(MERN)

<https://github.com/chonuboy>

Enthusiastic Full stack developer(MERN), proficient in React.js and Node.js. Skilled in MongoDB and Express.js for efficient web application development. As a full stack developer, I bring a fresh perspective and a commitment to delivering high-quality code. Eager to contribute to innovative projects and thrive in a collaborative environment.

## SKILLS

- React.js
- HTML5
- CSS3
- JavaScript (ES6+)
- Node.js
- Express.js
- RESTful API development
- MongoDB
- Full Stack Web Application
- Git Version Control
- Git Hub
- Redux
- Back End Integration
- Tailwind CSS
- Responsive Web Design
- Cross-browser Compatibility
- Web Designing
- Server-side Rendering (SSR)
- Python
- Frontend Developer
- Back End Developer
- Full stack Web Developer
- Troubleshooting, Debugging
- Project Management

## PROJECTS

### Nostra

(HTML,CSS,Javascript)

As the lead Web Developer for the creation of Nostra, an innovative e-commerce platform specializing in dress retail, I spearheaded the end-to-end development process utilizing HTML, CSS, and Javascript.

- Implement user authentication to allow users to create accounts, log in securely, and access personalized prediction features. Utilize JavaScript to handle user input and process prediction requests.

### BulkMailer

(HTML,React JS,Node JS,MongoDB.Mongoose)

Bulkmailer is an innovative platform designed for sending messages and emails to multiple accounts simultaneously, seamlessly blending modern design principles with cutting-edge technologies.

- Implemented React's real-time updates to provide users with instant feedback on the status of their sent messages. This feature ensures transparency and allows users to monitor the delivery progress in real-time.
- Collaborated with backend developers to integrate the front-end seamlessly with backend services, ensuring smooth data flow and communication functionality.

### Actodo

(HTML,TailwindCSS,Javascript,React.js)

Actodo seamlessly integrates React's robust functionality and Tailwind CSS's utility-first approach to deliver an intuitive, efficient, and visually appealing platform for adding and deleting tasks

- Engineered Actodo's front-end with React, employing a component-based architecture to create dynamic and responsive user interfaces. Users can effortlessly add and delete tasks in real-time, enhancing the overall user experience.

### Weather-API

(HTML,Tailwindcss,React JS,Node JS,API Integration)

Weather-API stands as a cutting-edge platform designed to provide users with real-time weather conditions for cities, seamlessly blending sophisticated design with intuitive functionality.

- Collaborated with backend developers to seamlessly integrate the front-end with backend services, enabling smooth data flow and communication with the weather API. This collaboration resulted in a cohesive and efficient weather information platform.
- Successfully integrated third-party weather API services to dynamically fetch and display real-time weather data. This integration ensures that users receive accurate and up-to-date information about the weather conditions in their selected cities.

## EDUCATION

Bachelor of Science in Physics  
Syed Ammal Arts and Science College | Apr 2020

Successfully Completed Full Stack Web  
Development Course on Error Makes Clever  
Academy | Feb 2024

## SOFT SKILLS

**Communication:** Effective communication to Facilitate and Collaboration and Understanding  
**Teamwork:** Flexible Person who is ready to Adopt Anything  
**Problem-Solving:** Having Excellence Skill in identifying and resolving Complex issues
